Your SEBO dealer:

## Intelligent Design.

The SEBO design goes deeper than superficial styling. SEBO vacuum cleaners are built to work. They are easy to maintain and simple to use.

Changing the filter bag is simple and clean - when the bag is sealed, no dust can escape.

Removal and maintenance of the brush roller requires no tools!

Double-size electrostatic exhaust filter for improved air quality.

The entire machine is user friendly and can be disassembled in minutes (no tools are necessary). Finding and clearing blockages has never been easier.

## SEBO - Award Winning Service and Quality.

SEBO was voted the NUMBER ONE vacuum dealer manufacturer in Germany for the eighth consecutive year by *Markt Intern*, the trade magazine for Germany's electronic appliance dealers.

SEBO continues to strive for innovative design, quality workmanship and outstanding service.

Versatile,  
and Powerful.**

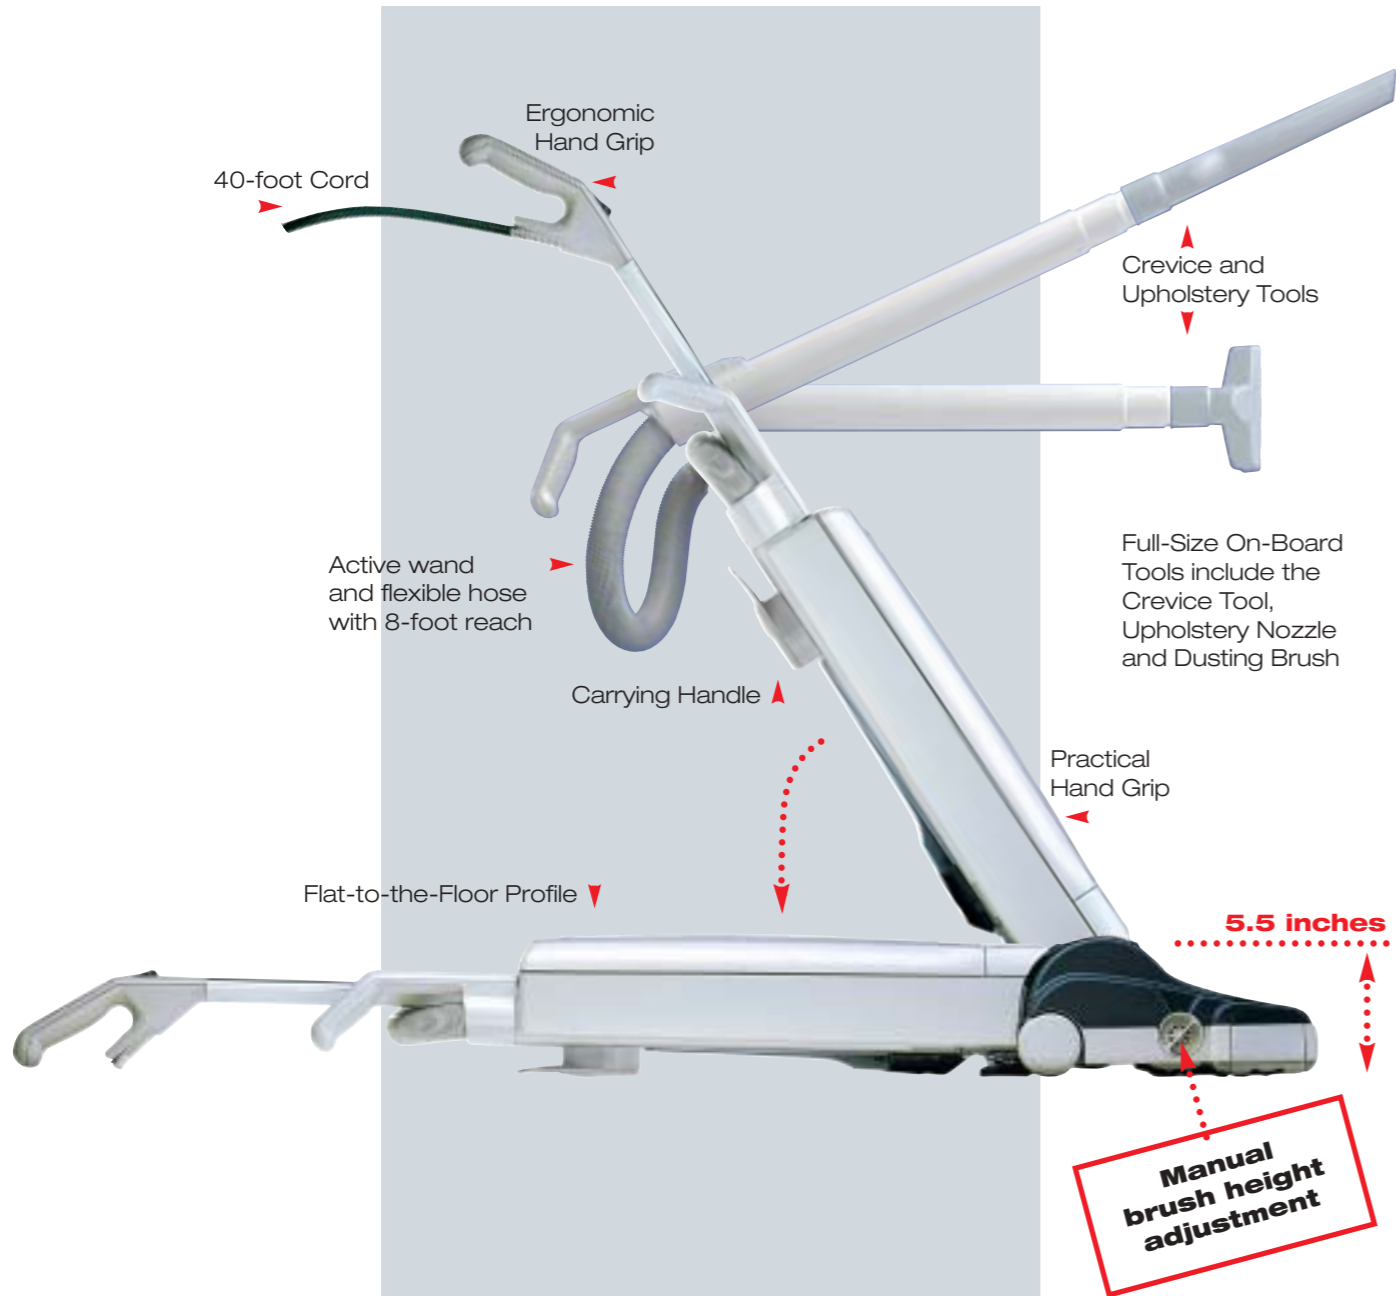

Pure Performance

Pure Performance

# Durable, versatile and powerful.

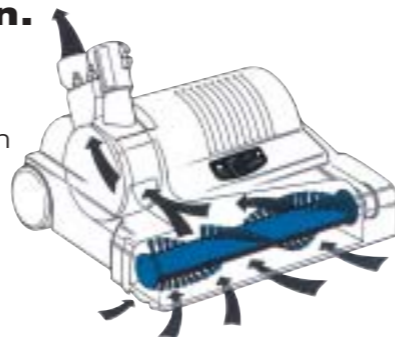

## SEBO - Respected Worldwide.

Professional users prefer SEBO worldwide. With good reason! Our success is due to our innovative products and our strong focus on quality. Modern technology, state-of-the-art design, and consistent customer focus are found in all SEBO products.

## Perfect Function: Brush Action, Suction and Filtration.

The brush removes the dirt and hair and moves it to the suction chamber. The strong airflow carries the debris to the three-layer filter bag.

# Advantages which protect user, floor and machine:

**The SEBO *essential* G-Series delivers effective carpet care, quality engineering and convenience features that are the essentials for a perfect vacuum cleaner.**

- Hospital-grade filtration
- Manual brush height adjustment
- Guaranteed belts
- Flat-to-the-floor profile
- High performance
- Excellent edge-cleaning performance
- 40-foot cord for large cleaning radius
- On-board accessories
- Automatic shut-down for blockages
- Easy and convenient brush roller change

## Belts that should last a lifetime.

The reinforced toothed belt on the SEBO *essential* G-Series vacuums will not slip or stretch resulting in a more efficient use of power and should last the life of the machine.

## Electronic Control.

The Electronic Control is the brain of the SEBO *essential* G vacuums. It is equipped with warning systems and automatic shut-off capabilities that are designed to alert the user to machine problems such as clogs, full bag and brush obstructions.

The Electronic Control will also tell you if you have the correct brush setting for optimum cleaning.

## The 3-step filtration system:

First, the three-layer, full-size filter bag (a) collects the vast majority of the debris.

Then, any remaining particles are collected by the hospital-grade micro-hygiene filter (b).

Finally, the micro-exhaust filter (c) cleans the exhaust air that the vacuum emits.

The S-class filtration system\* as described above, results in 99.9% effectiveness to 0.3 microns making the SEBO *essential* G-Series vacuums the perfect choice for customers who suffer from allergies and asthma.

\*Measurement SLG/Chemnitz  
SEBO uses only fiberglass-free filters
